

Solutions for

Pipe plants
Oil and gas companies
Certifiers

An aerial photograph of a densely populated city, likely Tokyo, showing a wide river (the Tone River) flowing through the center. The city is packed with numerous high-rise buildings and residential structures. Several bridges cross the river, and a multi-lane highway runs parallel to it. The sky is clear and blue, and the overall scene is captured from a high angle, providing a comprehensive view of the urban landscape.

When Safety
Matters –
InProCoat

innovative.
reliable.
secure.

As a reliable partner, we are familiar with the challenges our customers face. We have developed resilient solutions for efficient pipe coatings based on strong industry know-how to comply with regulations, environmental requirements and narrow time windows. Approvals for coating systems, applications and our own patents enable us to develop customised solutions

of the highest quality. Our diverse portfolio is supplemented by comprehensive services, such as processing. We gladly offer our services in the scope of our full-service principle. We out our logistics know-how at our customers' disposal on request as well: No matter if they need help with packaging, storage or transport: We deliver on time.

Compliance with deadlines creates trust

07

Parameters such as delivery and deadline compliance are of special importance in an environment of short production cycles in pipe plants with seamlessly interlocking processes.

As digitalisation increases, we make sure that our relationship with our customers remains transparent. Digitised project management allows you comprehensive insights into our processes. Thanks to real-time status recording, we are able to provide our clients with information on the processing steps their parts are currently going through at any time. Integrated quality control and an electronic documentation system secure deadline compliance to build up trust.

Master agreements with nearly every renowned supplier of coating materials enable us to ensure availability within 24 hours. We can also assist pipe mills with customised services such as pipe end processing.

Smart solutions for pipe mills.

Innovative procedures for perfect safety

We meet the growing demands of the oil and gas industries with a strong understanding of best safety and the ability to develop innovations.

Technical innovations are an unchanging mark of our corporate history that spans nearly one hundred years. Patents such as the 3LPE/3LPP method for coating pipes by automatic flame spraying are distinctive features of our innovative power. We can coat pipes with changing diameters (buckle arrestors, shaped pipes, riser pipes, cones and others) according to the DIN EN ISO 21809-1 standard with our 3LPE/3LPP method.

We consider high customer benefit both an incentive and obligation for our work. In light of this, we have developed a globally unique system. This technical innovation enables us to strip polyolefin-coated pipes fully automatically, no matter if the diameter is consistent or variable.

Innovative solutions for oil and gas companies.

Designing the future

11

We want to fulfil the wishes and ideas of our customers with individual and flexible services, and in compliance with all regulations, laws and environmental requirements.

We are happy to combine our strong understanding of quality and safety with our special know-how. Seamless combination of these three central parameters enables us to develop innovations to serial maturity again and again. With approvals for all coating systems and applications, we are a proven competence carrier for protection of valuable systems.

Our current development is targeted at a method for coating bends. The objective is to replace coating of this challenging shape by hand with a fully automatic process. We are certain that we will be able to bring this project to success. At the same time, it would mean a quantum leap in the history of coating technology.

Pioneering solutions for certifiers.

Your advantages – our services

 **inTime**

 **inTransfer**

 **inKnowledge**

 **inPlus**

Our comprehensive service range keeps us close to the customer. We work hard to achieve objectives as quickly as possible with functional processes, competence and smart services.

Approvals for all coating systems and application purposes, own patents and qualified employees form a solid foundation for our strong position in global competition. We additionally promote the high degree of qualification of our employees with our dedicated further-education academy for the area of coating of pipes and fire protection.

Our customers benefit from the added value our high competence in engineering contributes to all services. Our clients can profit directly from pipe end processing or non-destructive testing in our dedicated laboratory. Delivery capacity and delivery compliance are based on material procurement on short notice, highest flexibility and comprehensive logistics know-how. Internal logistics capacities with own vehicles and drivers enable us to react quickly.

www.inprocoat.com/en/company/customer-benefits

inTime

Working processes:

We supply on time and always reliable with our own laboratory and material procurement on short notice and detailed inspectors.

inTransfer

Our logistics know-how for your high-quality products:

Storage, secure transport and professional packaging – we keep everything running smoothly.

inKnowledge

Patents and approvals for coating systems and applications:

Qualified employees guarantee for high quality that our customers can rely on.

inPlus

Services with added value:

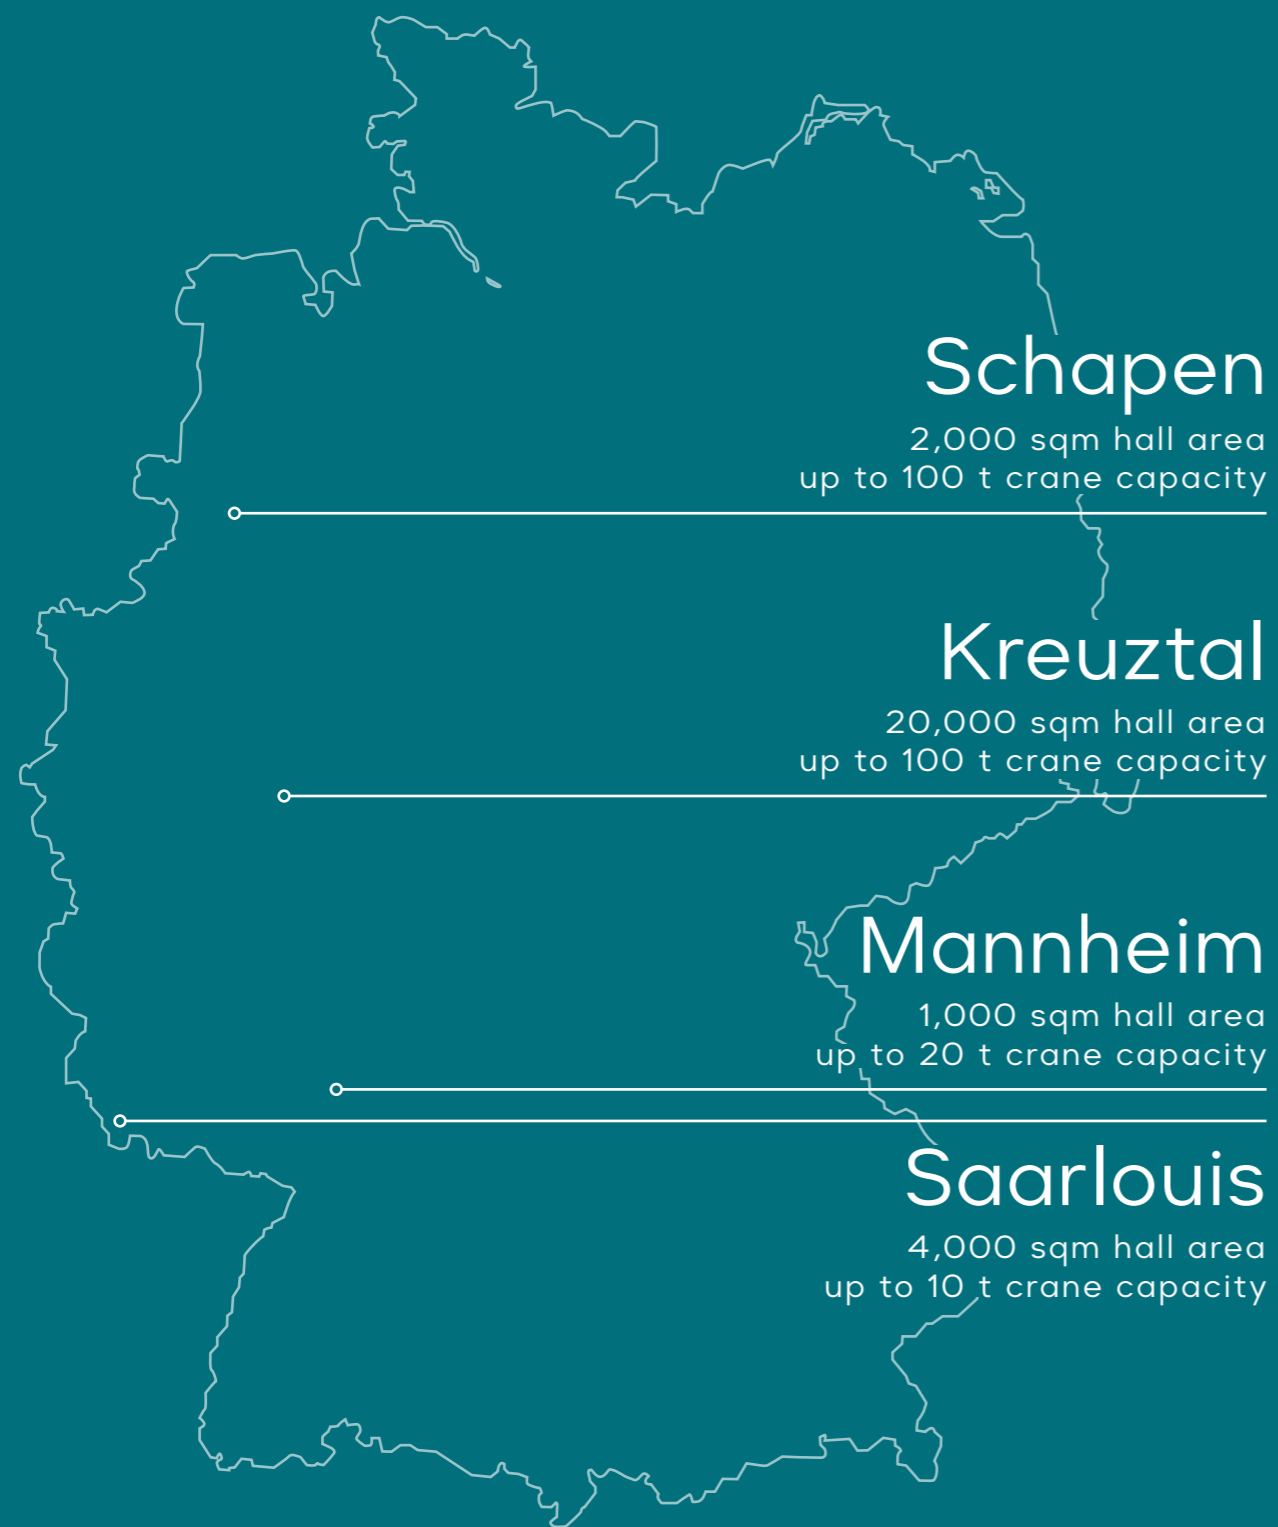

We will gladly take care of various processing steps or non-destructive testing for you.

Our procedures

We apply permanent protection to safety-relevant parts for our clients with innovative and globally unique procedures. We trust in know-how built up over decades when choosing the best coating. Depending on the respective area of use, we choose the optimal option for best protection and maximum safety.

- Pre-treatment
- Heat treatment
- Fire protection
- Pipe coatings
- Wet-paint coatings
- Potable-water coatings
- Thermal metal-spray coatings
- Industrial-vehicle coatings
- Offshore coatings
- Functional coatings

Our sites

Our name is synonymous with high-quality corrosion and fire protection of large steel and NF metal surfaces. We represent highest quality, reliability, and competence. Our corporate seat in Kreuztal and our facilities in Schapen, Mannheim and Saarlouis are close to the market and offer the best prerequisites for flexible action and efficient logistics services.

We established our position in global competition with our innovative services, pioneering solutions and a strong customer orientation. Patented and globally unique methods are some of our unique selling points. With our four plants, we are one of very few companies in Europe that can still offer the entire final stage of industrial production as a complete solution under a single roof.

OUR MISSION:

LEADING VALUE PROTECTION

We implement demanding solutions characterised by the greatest innovative spirit and progressive approaches for pipe plants, oil and gas companies as well as certifiers with our proven experience. We prevail in a harsh competitive environment with industry know-how, flexibility and the willingness to always offer just a little more.

Solution-oriented thinking and action, combined with a highly innovative attitude, keep us successful on the markets and permit continuous growth. New goals and challenges grow from this, to be mastered together with our clients. Today. And in future.
